SHADAB AHMED

DATA ENGINEER · SEB · KTH

Stockholm, Sweden

PROFILE

Data engineer at SEB building data systems for Financial Crime Prevention. I develop and scale data pipelines for transaction monitoring, handling large-scale data, transformation logic, and building platform capabilities to support detection of suspicious activity.

I have a strong foundation in data engineering principles, with hands-on experience and growing expertise in cloud platforms (GCP) and automation, delivering scalable, maintainable solutions. I value clean code and a builder mindset, and define “done” as documented and automated by default.

SKILLS AND TOOLS

Languages	Python, Java, Scala, SQL
Data	Hadoop, Kafka, Spark, Airflow, NiFi, Hazelcast, Kibana, MySQL
Cloud	GCP (BigQuery, Bigtable, Cloud Storage, Dataproc, Pub/Sub, Cloud Composer, IAM, and more)
Platform	Terraform, Docker, OpenShift, Git

CERTIFICATIONS

Google Cloud Big Data and Machine Learning Fundamentals

Google Cloud Skills Boost · Issued Feb 2026

View credential

Database, Big Data, and DevOps Services in GCP

LearnKartS · Issued Aug 2024

View credential

ETL and Data Pipelines with Shell, Airflow and Kafka

IBM · Issued Oct 2023

View credential

Google Cloud Professional Data Engineer Certification

In progress · Target completion 2026

EXPERIENCE

Data Engineer — Mar 2024 - Present

SEB · Financial Crime Prevention

- Design and scale data pipelines and ETL workflows for high-volume data processing and transformation.
- Define infrastructure as code and reusable patterns for consistent, scalable platform provisioning.
- Evolve the data platform through GCP migration and cloud-native data processing.
- Improve reliability and security through CI/CD, automation, and consistent unit testing.

Tech Trainee — Sep 2023 - Feb 2024

SEB · Tech Programme

- Completed SEB’s six-month Tech Trainee Programme, combining a full-time role with structured development, mentoring, and cross-functional learning.
- Gained broad exposure to SEB’s tech organisation through hands-on work, business challenges, hackathons, and structured programme activities.

Support Agent — Apr 2017 - Aug 2023

Visma · Part-time

Master Thesis Student — Jan 2023 - Jun 2023

IBM

- Researched the impact of net-zero transition on banking and enterprise IT strategy, based on qualitative insights from leading Swedish banks.
- Published thesis with recommendations for scalable, sustainability-aligned IT decision-making.
- Research publication: The Transition Towards Net-Zero Emissions: Implications for Banks and Their IT Strategies

ACADEMIC BACKGROUND

KTH Royal Institute of Technology

Master's degree, Industrial Management

2023

KTH Royal Institute of Technology

Civilingenjörsexamen, Informationsteknik

2023
