

SHADAB AHMED

DATA ENGINEER · SEB · KTH
Stockholm, Sweden

PROFILE

Data engineer at SEB building data systems for Financial Crime Prevention. I develop and scale data pipelines for transaction monitoring, handling large-scale data, transformation logic, and building platform capabilities to support detection of suspicious activity.

I have a strong foundation in data engineering principles, with hands-on experience and growing expertise in cloud platforms (GCP) and automation, delivering scalable, maintainable solutions. I value clean code and a builder mindset, defining “done” as documented and automated where possible. I am curious by default, and biased towards simplicity.

SKILLS AND TOOLS

Languages Python, Java, Scala, SQL, Bash
Data Hadoop, Kafka, Spark, Airflow, NiFi, Hazelcast, Kibana, MySQL
Cloud GCP (BigQuery, Bigtable, Cloud Storage, Dataproc, Pub/Sub, Cloud Composer, IAM, and more)
Platform Terraform, Docker, OpenShift, Argo CD, Helm, Git

CERTIFICATIONS

Google Cloud Big Data and Machine Learning Fundamentals

Google Cloud Skills Boost · Issued Feb 2026
View credential

Database, Big Data, and DevOps Services in GCP

LearnKartS · Issued Aug 2024
View credential

ETL and Data Pipelines with Shell, Airflow and Kafka

IBM · Issued Oct 2023
View credential

Google Cloud Professional Data Engineer Certification

In progress · Target completion 2026

EXPERIENCE

Data Engineer

SEB · Financial Crime Prevention

Mar 2024 - Present

- Design and scale data pipelines and ETL workflows for high-volume data processing and transformation.
- Define infrastructure as code and reusable patterns for consistent, scalable platform provisioning.
- Evolve the data platform through GCP migration and cloud-native data processing.
- Improve reliability and security through CI/CD, automation, and consistent unit testing.

Tech Trainee

SEB · Tech Programme

Sep 2023 - Feb 2024

- Completed SEB’s six-month Tech Trainee Programme, combining a full-time role with structured development, mentoring, and cross-functional learning.
- Gained broad exposure to SEB’s tech organisation through hands-on work, business challenges, hackathons, and structured programme activities.

Support Agent

Visma · Part-time

Apr 2017 - Aug 2023

Master Thesis Student

IBM

Jan 2023 - Jun 2023

- Researched the impact of net-zero transition on banking and enterprise IT strategy, based on qualitative insights from leading Swedish banks.
- Published thesis with recommendations for scalable, sustainability-aligned IT decision-making.
- Research publication: [The Transition Towards Net-Zero Emissions: Implications for Banks and Their IT Strategies](#)

ACADEMIC BACKGROUND

KTH Royal Institute of Technology

Master's degree, Industrial Management

2023

KTH Royal Institute of Technology

Civilingenjörsexamen, Informationsteknik

2023
